

150ft Off-Grid Solar Container in Switzerland

Overview

Operating entirely off the grid, these homes match renewable energy sources with modern design. Nestled in a tiny town off the coast, this container home echoes the main ingredient the owners had hoped for in a weekend. In general, a basic solar trailer (plug-and-play PV only) starts around €21,500 for a 12.6 kWp system with 41 kWh battery, while mid-range hybrid containers (80-200 kW PV with LiFePO4 storage) often cost €30,900-€43,100; small off-grid units can be found for ~\$9,850-\$15,800, and turnkey BESS. Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure. These prefab solutions make unplugged living. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Article Content

Off Grid Container Homes

Our off-grid shipping container homes offer a unique opportunity to create a self-sufficient, personalized haven designed to fit your needs. From innovative floor plans to green features, ...

Intech Energy Container

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery bank, ...
