

24-year photovoltaic energy storage policy

Overview

This table includes all existing state energy storage procurement mandates, targets, and goals. The 2025 code cycle of Title 24, also known as California Building Standards Code, will be effective beginning January 1, 2026. This technical bulletin provides an update on solar and storage installation compliance requirements in Part 6, California Energy Code, as well as CSU-specific reporting. Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades, according to US federal data. From pv magazine USA Project developers and utility operators are preparing. The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage systems (BESS), and BESS-ready infrastructure. A solar PV system is prescriptively required for all newly constructed buildings.

Article Content

Solar, storage to lead record 86 GW of US capacity in 2026

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...

Solar and Storage Industry Research Data - SEIA

This is enough to power every home in America for 58 minutes, or over 5 million homes for an entire year. Storage deployment demand is driven by falling costs for battery energy storage systems ...

Solar PV, Solar Ready, Battery Energy Storage System ...

The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage ...

Energy Storage Targets | State Climate Policy Dashboard

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

Table of State Energy Storage Targets and Progress

These terms describe various ways states may set an intention to attain a specified level of energy storage deployment by a specific date, and the role of regulated electric utilities in helping realize that ...

2025 Energy Code Measure Proposal

This measure is an extension of nonresidential photovoltaic (PV) system and battery storage system requirements currently in the 2022 Energy Code.

2025 Energy Code Title 24, Part 6 Fact Sheet: Nonresidential: ...

This technical bulletin provides an update on solar and storage installation compliance requirements in Part 6, California Energy Code, as well as CSU-specific reporting requirements.

State by State: An Updated Roadmap Through the ...

Below we give an overview of each of these energy storage policy categories. Procurement targets require utilities to acquire a specified quantity of ...

State by State: A Roadmap Through the Current US ...

All of the states with a storage policy in place have a renewable portfolio standard or a nonbinding renewable energy goal.
