

# Abu Dhabi solar container battery Power Station

## Overview

Located in Abu Dhabi, the project will feature a 5.2 gigawatt DC solar photovoltaic plant, coupled with a 19 gigawatt-hour battery energy storage system, setting a global benchmark in clean energy innovation. The record-breaking solar power and battery storage project will create over 10,000 new jobs, driving innovation and economic growth. Abu Dhabi Future Energy Company PJSC – Masdar and Emirates Water and Electricity Company (EWEC) announced today the launch of the world's first large-scale 'round the clock' gigascale project, combining solar power and battery storage to provide 1GW of 'round-the-clock' dispatchable power. That is the wager the United Arab Emirates is placing with what is being billed as the world's first gigascale, round-the-clock renewable energy project. Unlike the sprawling solar parks already familiar across the Gulf, this facility is being built with one crucial addition: storage on a scale the world has never seen. A project combining solar generation and battery storage to provide 1GW of 'round-the-clock' dispatchable power was unveiled at Abu Dhabi Sustainability Week (ADSW). The \$6 billion (AED22 billion) initiative will deliver 1 gigawatt (GW) of continuous power. ABU DHABI, UAE, Jan.
