

# Abu Dhabi solar container battery Project

## Overview

The roughly AED232 billion (US\$5.2 billion) of solar PV with a 19GWh battery energy storage system (BESS), which Masdar claimed was the “largest and most technologically advanced system of its kind in the world.” The project is expected to be completed in 2023. In the presence of President His Highness Sheikh Mohamed bin Zayed Al Nahyan, Abu Dhabi Future Energy Company PJSC – Masdar and Emirates Water and Electricity Company (EWE) today announced the launch of the world's first large-scale 'round the clock' gigascale project, combining solar power and battery storage. The record-breaking solar power and battery storage project will create over 10,000 new jobs, driving innovation and economic growth in Abu Dhabi. Abu Dhabi Future Energy Company PJSC – Masdar and Emirates Water and Electricity Company (EWE) announced today the launch of the world's first large-scale 'round the clock' gigascale project, combining solar power and battery storage. The heart of the project is a battery energy storage system (BESS), built by global leader CATL. Solar panels make power only when the sun is out. The BESS captures extra energy in the day and releases it after sunset, turning sunlight into 24/7 power. Masdar has kicked off construction on what it claims to be the world's biggest. On a stretch of desert within view of a camel racetrack and protected land for ancient dunes — where fighter jets from the Al Dhafra Air Base occasionally zip by overhead — Abu Dhabi renewable energy firm Masdar has begun construction on the world's largest solar-and-battery power project.
