

Are photovoltaic panels still falling in price

Overview

Residential solar prices are falling lower than ever before, said marketplace operator EnergySage in its biannual solar and storage marketplace report. The median quoted price on its platform reached \$2. 50 per watt in the second half of 2024, falling 6. Quotes. EnergySage has released its 20th semiannual report, showing that residential solar panel prices hit an all-time low in 2024. Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30%. Are solar panels still getting cheaper in 2026 or have we reached the bottom?

The answer is not a simple yes or no. Solar pricing in 2026 is shaped by manufacturing costs, supply chain, global demand, government policies and new technologies all moving at the same time. In this guide we will break. One of the most transformative changes in technology over the last few decades has been the massive drop in the cost of clean energy. There's a big new solar tax credit in town.
