

Australia's export tariffs on solar modules

Overview

Compare solar feed-in tariff rates across Australian states. See what you can earn for exporting excess solar to the grid. In recent years, discussions about a two-way pricing structure, or a solar tax on exports to the grid, have been taking place between electricity distributors. In July 2024, we are introducing an opt-in two-way tariff for new and existing residential and small business customers who are export ready. Why introduce two-way. The sun tax (also called a solar export tax or two-way tariff) is a new pricing structure that applies to households with solar. This cost is passed on by. From 60 cents for every kilowatt hour of output your solar panels exported to the grid, to 60 cents for every kilowatt they produced regardless of how much you used yourself, times were heady. At. So here is our take on the six 'W's (and one 'H') of the AEMC draft determination on 'access, pricing and incentive arrangements for distributed energy resources.
