

BESS price for solar panel installation

Overview

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels cost between \$24,000 and \$36,000. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. System purchases offer dramatic savings: Buying panels as part of a complete solar system costs 40-65% less per panel (\$0.50/watt) compared to individual retail purchases (\$0.75/watt). The most accurate pricing metric is still cost per watt, but per-sq-ft estimates are helpful for ballpark figures. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. NLR's PV cost benchmarking work uses a bottom-up. Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor.
