

# Bahamas battery energy storage peak shaving power station

## Overview

Here are key points: Definition: Peak shaving is a strategy to eliminate demand spikes by reducing electricity consumption during high-demand periods<sup>1</sup>. The island is powered by eight medium-sized heavy fuel oil (HFO) generators. If one generator failed, it would lack the power to handle its three daily peaks. How it Works: Battery energy. Bahamas Power and Light (BPL) has announced significant plans to develop large-scale solar power projects integrated with battery storage, a move set to enhance energy reliability across the islands. This article explores the project's significance, technical specifications, and its potential to transform the Caribbean's energy landscape. The energy storage system will provide spinning reserve services to enhance the. The technology group Wärtsilä will supply a 25 MW / 27 MWh advanced energy storage system for Bahamas Power and Light Company (BPL). In combination with a 132 MW power plant operating on seven Wärtsilä 50DF dual-fuel engines supplied to BPL in 2019, the integrated Wärtsilä solution will provide the.
