

Cuba solar incentives

Overview

Cuba will allow workers to purchase solar panels and sell renewable energy to third parties in an attempt to alleviate the energy crisis. The measures come in the midst of power outages and fuel shortages. Amid the energy crisis that has left Cuba in the grip of endless blackouts and a severe fuel shortage, the government announced a measure that could represent a troubling shift, as workers will be able to access solar modules, while new "facilities" are opened for those who generate electricity to. In a strategic move toward energy self-sufficiency, Cuba is significantly expanding its solar energy infrastructure. Image: Jorge Luis Baños /IPS HAVANA TIMES – A new decree, published on November 26, requires high-energy consumers in Cuba, whether. This is part of Cuba's national plan that calls for the construction of 55 solar parks by 2025, each with a capacity of 21.8 MW, with a total capacity of 1,200 MW by the end of 2025. These photovoltaic parks are part of a plan presented by the Cuban Ministry of Energy and Mines (Minem) in March. HAVANA, Dec 12 (IPS) - With Decree 110, published on 26 November, Cuba made it mandatory for major consumers, whether they are state or private entities, to invest in the use of renewable energy sources, while the energy crisis facing the country worsens. According to the decree, state and private. Cubans are increasingly turning to solar power, scrambling to install panels on homes, businesses, and even vehicles, as the island grapples with severe, extended blackouts. This energy crisis is largely attributed to Washington's ongoing efforts to prevent oil shipments from reaching the Caribbean.
