

# Cylindrical solar energy storage cabinet lithium battery classification

## Overview

ISO 3941:2026 introduces Class L, a new fire classification for lithium-ion battery systems that reflects their unique electrochemical behavior. Cylindrical lithium batteries are divided into phosphate, lithium cobaltate, lithium manganate, cobalt-manganese mixture, and ternary materials. Batteries with different material systems have different advantages. This article explains what Class L means, how it reshapes fire engineering expectations, and why propagation control and gas mitigation are central to.
