

Cyprus double-glass solar module processing plant

Overview

New solar panel factory built with EU support leads to large new orders and further investment in state-of-the-art production line. For an entrepreneur considering a solar module factory in Cyprus, the island presents a compelling opportunity. With solar irradiation levels among the highest in Europe, averaging between 1,750 and 2,000 kWh/m² annually, the island has an abundance of the fundamental resource for solar power. Yet, for many homeowners and business owners across the. Cyprus is experiencing unprecedented growth in utility-scale solar development, with 797 MW of installed photovoltaic capacity as of December 2024 and ambitious plans for gigawatt-scale expansion by 2030. As the Mediterranean's emerging solar powerhouse, Cyprus offers exceptional opportunities for. Choose the glass construction you please and leave its installation in the hands of the experts! Having in our disposal one of the most advanced glass processing plants in the Middle East with ISO 9001 specifications, we offer to our customers in Cyprus processed glass for both the construction and.
