

Egypt Desert Solar Power Plant

Overview

The Benban park extends over an area of 37 square kilometres near the “desert road” between Aswan and Cairo. Launched in 2018 with the commissioning of the first photovoltaic plant, this mega-project has been integrated into the strategy developed by the Egyptian New and Renewable. Benban Solar Park is a photovoltaic power station in Egypt with a total capacity of 1650 MW nominal power which corresponds to an annual production of approximately 3. It is located in Benban (Aswan Governorate) in the western desert, approximately 650 km south of Cairo and 40 km northwest of. Collaborate with decision-makers of Solar PV projects across Egypt for business opportunities. 8 GW complex constructed using 41 individual photovoltaic (PV) electricity-generating facilities across 37. It is the largest solar park in Africa and one of the largest globally, with a total installed capacity of 1. Image courtesy of International Finance Corporation.
