The full-scale Russian war against Ukraine, which began on 24 February 2022, significantly increased the risks of security of electricity supply in Estonia. According to the nationwide risk analysis, the risk ...

Electricity sector in Estonia

Estonia's electricity sector is interconnected with regional energy markets, particularly through connections with Finland and Latvia. The direct electrical interconnection with Finland was established in 2006 and was further strengthened by the Estlink 2 interconnector in 2014. Estonia joined the Nord Pool Spot market by 2012, securing its own price area within this regional electricity market. In 2018, oil shale constituted approximately 80% of Estonia's electricity consumption. By 2021, this figur...

Electricity Market Act-Riigi Teataja

(5) A producer who uses wind as the source of energy and who complies with the condition described in subsection 2 2 of section 59 of this Act may receive support until support has ...

EVS standard evs.ee | en

For passengers with disabilities or reduced mobility, even minor obstacles can make a journey difficult or even unsafe. The updated EVS-EN ISO 10993-1 guides the biological evaluation of medical devices.
