

Fire extinguishing equipment at power exchange cabinet station

Overview

According to the actual environment of the switch cabinet, it is recommended to use the JTR-XR series fire detection and extinguishing control system with a micro aerosol automatic extinguishing device to form a fire protection system. The two solutions focus on solving cost and safety. The Occupational Safety and Health Administration (OSHA) establishes clear guidelines for fire extinguisher placement in workplaces, with specific considerations for electrical equipment areas and transformer installations. These regulations aim to ensure rapid access to fire suppression tools. Complete fire protection for power plants, gas turbines, and generator rooms. As a complete supplier of. The heat from failed capacitor bank completely destroyed the attached main incomer 400 volt switchboard for a very large shopping mall and spread the fire around substation.
