

Friends invented solar generator

Overview

Shuman built the world's first solar thermal power station in Maadi, Egypt (1912-1913). Shuman's plant used semi circle shaped troughs to power a 60-70 horsepower engine that pumped 6,000 gallons of water per minute from the Nile River to adjacent cotton fields. Frank Shuman (/ 'ʃu:mən /; January 23, 1862 - April 28, 1918) was an American inventor, engineer and solar energy pioneer known for his work on solar engines, especially those that used solar energy to heat water that would produce steam. This groundbreaking finding laid dormant for over a century until 1954 when Bell Labs created the first practical silicon solar cells. She spent much of her life researching solar energy and designed many solar-powered. The story goes back as far as 1839, and it includes giants of science such as Einstein along the way. Throughout her career, she published widely on the topics of solar heating, thermoelectric generators and distillers, and electrical conductivity of solid electrolytes. Originally from Hungary, Telkes came to the U.

Article Content

The forgotten 20th Century "Sun engine"

The world's first solar power station was built before World War One, created by a man with a vision for cleaner air.

NIHF Inductee Maria Telkes Invented Solar Power ...

Maria Telkes was a highly respected innovator in solar energy. Throughout her career, she published widely on the topics of solar heating, ...

This Biophysicist "Sun Queen" Harnessed Solar Power

Today we tell the story of Mária Telkes, one of the developers of solar-thermal storage systems. Telkes was so dedicated to the world of solar ...

The History of the Solar Generator

But who invented solar generators depends very much on how you look at it. The first scientist to discover that two metal electrodes placed in an ...

Mária Telkes | American Physical Chemist

Mária Telkes was a Hungarian-born American physical chemist and biophysicist best known for her invention of the solar distiller and the first solar-powered ...

A Brief History of Solar Panels

Although this patent was not for a solar panel, these thermal generators were invented to either convert heat directly into electricity or to transform that energy ...

Watch how Nobel Prize winner Omar Yaghi has invented a solar ...

Watch how Nobel Prize winner Omar Yaghi has invented a solar-powered atmospheric water generator (AWG) that can produce up to 1,000 liters of clean drinking water from thin air daily ...

Telkes, Maria

In 1948, Telkes researched and designed a new solar heating system, which was installed in a solar house built on the estate of sculptor Amelia Peabody in Dover, Massachusetts; the house was ...

The Evolution of Solar Generators: Past, Present, and ...

The first portable solar generators were basic systems combining rudimentary solar panels with lead-acid batteries. Despite their limitations, these ...
