

# How many watts of outdoor solar power hub does ghana have

## Overview

Accra, July 25, GNA - Ghana will today, 25th July, 2024 outdoor its first phase of 1000 megawatts solar project to provide power for companies in the free zone enclave. In 2023, the total electricity generated from solar sources stood at 9,335 GWh The following are the key developments in Ghana's solar energy sector: Policy Framework: The Renewable Energy Act 2011 (Act 832) established a legal and regulatory framework for the promotion of solar energy development. At completion, the solar project, which will be the largest solar plant in Africa and the second in the world, would pave the way. The Ghana Scaling-Up Renewable Energy Program (SREP) Mini grid and Net metering with Solar PV project involves the development of 35 mini grids in the Volta Lake region and the deployment of 12,000 units of roof-mounted net-metered solar PV systems for public institutions, Small and Medium-sized. The report on Ghana's solar energy landscape by the International Solar Alliance highlights the country's electricity consumption of 647. Ghana had a solar capacity of 107.9 MW in 2021, with supportive renewable energy policies such as net metering and feed-in tariffs. This is expected to contribute 33.
