

How much does a 200x90 solar panel cost

Overview

A single solar panel costs between \$120-\$315 for the equipment only, or \$1,000-\$1,200 when professionally installed. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. System purchases offer dramatic savings: Buying panels as part of a complete solar system costs 40-65% less per panel (\$0. 50/watt) compared to individual retail purchases (\$0. This typically translates to about \$2. 50 per watt of installed capacity (more on price per watt below). The total price depends. In this guide, we'll break down average solar costs per square foot in 2025, show how they compare by home size, explain why this metric has limits, and give you expert tips to reduce your price.
