

How to check if solar panels are not generating electricity

Overview

This comprehensive guide will walk you through proven diagnostic methods, identify the 12 most common causes of underperforming solar panels, and provide actionable solutions to restore your system's peak performance. Are your solar panels not working properly?

Is your inverter giving a warning light on its display?

There must be a technical issue with your system while producing and delivering the desired amount of power. Troubleshooting basic issues is something that every homeowner should be aware of. If you have solar panels installed at your home, it's important to know how to check if they're working properly. Before you panic or immediately call a technician, there are several simple troubleshooting steps you can take to potentially resolve the issue yourself. Fluke recommends using the Fluke 117 Electrician's Multimeter or Fluke 283 FC CAT III 1500 V Digital Multimeter to test solar modules.
