

# Installation Scheme for 400V Lead-Acid Battery Cabinet

## Overview

This paper makes recommendations and provides guidelines relating primarily to the handling, installation and bench marking processes for large lead-acid battery systems of the wet and valve regulated varieties. Stationary battery systems are generally employed in mission critical installations and require special consideration from project conception through final test. Such applications include data processing centers, process control, signaling systems and switch gear, to name but a few. However. Remove the plate in front of the battery shelves. Clearance around the equipment should be as suggested by NEC and/or all applicable. Refer relevant HBL I&O Manual, supplied along with respective battery system, for relevant other installation instructions Refer the General Arrangement Drawing (GAD) for battery connections and place one module at a time on top of the module already in place. The warning symbol is an exclamation mark in a triangle. Ce manuel comporte des instructions importantes que vous êtes invité à.
