

Is energy storage an industry or a service industry

Overview

The global energy storage as a service market size was valued at USD 1.2 billion in 2020 and is expected to expand at a compound annual growth rate (CAGR) of 10.7% from 2021 to 2028. The market is expected to be driven by the increasing demand for power management services and cost-effective battery backup power. The customer energy management services segment led the market and accounted for over 30.0% share of the global revenue in 2020. Customer energy management services include power reliability, power quality. The industrial, residential, and commercial segment led the market and accounted for over 70.0% share of the global revenue in 2020. Energy storage as a service model is majorly adopted by. Energy storage as a service is a business model which came to light in 2016. According to Synergy BV, the term energy storage as a service was trademarked by Constant Power in 2016. North America dominated the market and accounted for over 30.0% share of the global revenue in 2020 on account of several factors including.
