

Is it okay to install photovoltaic panels on stones

Overview

Large rocks in your soil or wet, unstable ground can make it difficult or impossible to install the proper foundation. To protect solar panels from stones, you can consider using a protective mesh or screen that is designed to withstand the impact of thrown stones without hindering the sunlight that reaches the panels. You can also install them in a location that is less exposed to such risks, like on a high roof. Solar panels are a great way to generate clean, renewable energy, but they can be vulnerable to damage from stones and hail. If you live in an area where there is a risk of hail or stone storms, it is important to take steps to protect your solar panels. But. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off!
