

Large Energy Storage System Certification

Overview

Large batteries present unique safety considerations, because they contain high levels of energy. Additionally, they may utilize hazardous materials and moving parts. We work hand in hand with system integrators as a UL 9540, the Standard for Energy Storage Systems and Equipment, is the standard for safety of energy storage systems, which includes electrical, electrochemical, mechanical and. We also offer performance and reliability testing, including capacity claims, charge and discharge cycling, overcharge abilities, environmental and altitude simulation, and combined temper. Depending on the applicability of the system, there will be different standards to fulfill for getting the products into the different installations and Markets. Depending on th. We conduct custom research to help identify and address the unique performance and safety issues associated with large energy storage systems. Research offerin.
