

# Luanda electric vehicle incentives

51.2V 150AH, 7.68KWH

## Overview

The initiative is designed to accelerate the adoption of electric vehicles in Angola, contributing to the decarbonization of the country's transport sector. Within the 2024–2025 period alone, Sonangol plans to establish 70 EVCPs, including 30 in the capital, Luanda. In 2025, Angola's electric vehicle (EV) market is gaining momentum, driven by government initiatives, growing awareness of environmental issues, and shifting economic dynamics. The country is positioning itself as a key player in Africa's move toward electric mobility, though obstacles remain. Rebates can be claimed at or after purchase, while tax credits are claimed when filing income taxes. Find state and local-specific incentives. gh financial and non-financial incentives. While incentives generally entail an increase in public spending, they also create opportunities for the development of a market that brings with erall attractiveness of electric mobility.
