

McDonald's Photovoltaic Energy Storage

Overview

At a new McDonald's restaurant that just opened at Walt Disney World Resort in Florida (with COVID-19 protection measures in place), solar panels covering the roof—and solar glass panels throughout the building—are designed to generate enough energy that the restaurant can run on. At a new McDonald's restaurant that just opened at Walt Disney World Resort in Florida (with COVID-19 protection measures in place), solar panels covering the roof—and solar glass panels throughout the building—are designed to generate enough energy that the restaurant can run on. Power producer EDF Renewables North America signed a 15-year virtual power purchase agreement (VPPA) with McDonald's, which will help the fast-food chain meet its sustainability goals. EDF Renewables North America will supply low-carbon electricity from its 255 MWac / 332 MWdc Apollo Solar project. SAN DIEGO (Sept. The 255 MWac / 332 MWdc Apollo Solar project will help McDonald's to meet its sustainability goals and advance its commitment to climate. The Virtual Power Purchase Agreements for 189 MW from Enel's Blue Jay Solar is expected to cover 100% of McDonald's U. McDonald's is challenged by the lack of standardized and actionable data to support its efforts in meeting China's 3060 carbon targets.
