

# Solar Thermal Power Generation Product Certification

## Overview

ICC-SRCC OG-100 is the most widely recognized certification program for solar thermal collectors in North America, ensuring that certified products can be sold, incentivized and installed virtually anywhere in the region. These systems harness the sun's energy to generate heat, which is then used for space heating, cooling, or producing hot water and steam. However, ensuring IAPMO R&T has been certifying solar thermal products, both collectors and systems, since the technology enjoyed its first heyday in the mid-1970s. For speed to market, credibility in name, and mark of conformity, as well as a complete certification program for all applicable North American codes and. Intertek provides certification services for Solar Thermal products through our network of laboratories including testing to various standards such as SRCC SD 100, OG 100, and EN 12975-1. Solar Thermal is one of the fastest growing technologies in the renewable energy market. It is one of the fastest growing technologies in the renewable energy industry. Our laboratory's services comply with the DIN/EN/ISO/IEC 17025 norm. Published by ICC and ICC-SRCC, the standard sets minimum safety, durability and performance requirements for many types of solar thermal collectors.

## Article Content

### Global Certification for Solar Thermal Products

There is a registered list for certified solar thermal products that are eligible for subsidies and also a procedure for accepting certification bodies and laboratories.

### Solar Thermal System Testing

Intertek provides certification services for Solar Thermal products through our network of laboratories including testing to various standards such as SRCC SD 100, OG 100, and EN 12975-1. Solar ...

### Solar thermal products | TÜV Rheinland

The certification content and procedures are defined in a specific European certification program, which was developed in collaboration with the European ...

### Solar Thermal and Solar Boiler Certification Services

We test and certify your thermal solar products and check them for reliability, safety, performance and usability. When your product successfully withstands the ...

### Solar Testing and Certification

We are an ISO 17025 accredited Testing Laboratory and an ISO 17065 accredited Certification Body for Solar products. LabTest is the industry leader in assisting ...

### Solar Thermal System Testing | WO | TÜV Rheinland

National and international companies rely on our tests and certification to ensure the safety, functionality and reliability of their solar systems and components.

### SOLAR SYSTEMS CERTIFICATION

For speed to market, credibility in name, and mark of conformity, as well as a complete certification program for all applicable North American codes and ...

### Certification for Solar Thermal Power System Performance

In this article, we will delve into the importance of certification for solar thermal power system performance, the various testing protocols in place, and the benefits of obtaining a certification.

### Solar ABCs: Codes & Standards

The Solar Rating & Certification Corporation (SRCC) provides authoritative standards for solar thermal products with the intention of protecting and providing guidance to consumers, incentive providers, ...

### OG-100 CERTIFICATION PROGRAM

ICC-SRCC OG-100 is the most widely recognized certification program for solar thermal collectors in North America, ensuring that certified products can be sold, incentivized and installed virtually ...
