

Solar panel bracket without drilling

Overview

Our no-drill mounting plate offers a strong, weather-resistant solution using marine-grade adhesive—no holes required. Made from UV-stable PETG plastic with a custom dovetail texture for maximum grip, this mount is compatible with 1/4" and 5/16" hex head bolts. Its threaded stud feature and marine-grade adhesive compatibility give it a real edge for secure, corrosion-resistant mounts—perfect if. Check each product page for other buying options. Need help?

Solar Stack eliminates the weak points of traditional mounting, ensuring a watertight, warranty-safe installation every time. Backed by a Miami-Dade NOA and engineered to withstand winds up to 180 mph, Solar Stack has been tested, trusted, and proven in the field. Up until recently, the only way to install solar panels without drilling was if you had a flat roof but the good news is that a few innovative companies have created systems that let you install solar panels and don't require drilling through the roof.
