

Solar power generation accounts for the proportion in the country

Overview

Solar energy accounted for some 6.91 percent of electricity generation in the United States in 2024, up from a 5.62 percent share a year earlier. Ember (2026); Energy Institute - Statistical Review of World Energy (2025) – with major processing by Our World in Data This dataset contains yearly electricity generation, capacity, emissions, imports and demand data for European countries. You can find more about Ember's methodology in this. A review by the SUN DAY Campaign of data just released by the US Energy Information Administration (EIA) reveals that the mix of renewable energy sources provided nearly 26% of US electrical generation in 2025 as well as over 36% of installed generating capacity. 5% to 7% of the world's electricity, marking a continued rise in its contribution to global energy generation. Article Content

Solar power by country

Photovoltaic systems account for the great majority of solar capacity installed in the world. CSP represents a minor share of solar power capacity, and is present in ...

Solar Power by Country 2026

Data and analysis including a list of solar power in every country in ...

Renewables were 26% of US generation and 36% of installed ...

A review by the SUN DAY Campaign of data just released by the US Energy Information Administration (EIA) reveals that the mix of renewable energy sources provided nearly 26% of US ...

Electricity in the U.S.

Solar photovoltaic and solar thermal power plants provided about 4% of total U.S. utility-scale electricity and accounted for 18% of utility-scale electricity generation from renewable sources ...

US Electricity 2025

The United States' shift towards clean electricity continued in 2024, as wind and solar together rose to 17% of total electricity generation, surpassing coal, which dropped to an all-time low ...

35 Latest Solar Power Statistics, Charts & Data

4.4% of our global energy comes from solar power. China generates more solar energy than any other country, with a current capacity of 308.5 GW. ...

U.S. Renewable Energy Factsheet

Wind and solar are the fastest growing renewable sources, but contribute less than 3% of total energy used in the U.S. 1 The U.S. has an estimated 463,400 TWh ...

A Decade of Growth for U.S. Solar and Wind | Climate Central

About 28% of all U.S. solar power generated in 2024 came from small-scale solar installations, such as residential rooftop or community solar systems, which have less than 1 ...

Solar energy penetration U.S. 2024 | Statista

Solar energy accounted for some 6.91 percent of electricity generation in the United States in 2024, up from a 5.62 percent share a year ...
