

# Somaliland off-grid solar

## Overview

The main objectives of the facility include supporting households and SMEs get affordable energy by getting access to Lighting Global quality verified Off-Grid Solar (OGS) systems across Somaliland, supporting early stage local solar service providers (SSPs), enabling SSPs. The main objectives of the facility include supporting households and SMEs get affordable energy by getting access to Lighting Global quality verified Off-Grid Solar (OGS) systems across Somaliland, supporting early stage local solar service providers (SSPs), enabling SSPs. The abundance of free energy provided by sunlight presents an unparalleled opportunity to revolutionize energy access in rural areas, specifically in the Somalia and Somaliland regions. Our initiative focuses on designing stand-alone solar power systems capable of energizing homes, businesses. In East Africa, the government's favorable policy environment has helped to make investment viable as compared to other parts of Africa where high taxes and subsidies on alternative energy like kerosene continue to create barriers. We work through local management teams to create access to vital electricity service for the people who need it most. © 2025 Solar Run | All rights reserved. Design, Supply, Installation, Testing and Commissioning of Hybrid/Off-Grid Solar Photovoltaic Plants with Battery Energy Storage Systems for 21 Health Facilities in Sahil, Sanaag and Togdheer Regions of Somaliland with 2 Years of Operations and Maintenance (O&M) Services (Two-envelope Bidding. The project, SEAP, has three components: Technical Assistance, Capacity Building and Project Management. The Somaliland Off-Grid Solar Grant Facility (Component 1) This grant facility fund is part of component 1 of the SEAP project.
