

# Tehran energy independence

## Overview

In a significant development for its energy sector, Iran announced this week the discovery of substantial new natural gas and oil reserves, a find that officials say will help secure the nation's long-term energy supply and economic resilience amid persistent international. In a significant development for its energy sector, Iran announced this week the discovery of substantial new natural gas and oil reserves, a find that officials say will help secure the nation's long-term energy supply and economic resilience amid persistent international. Iran announced the discovery of 10 trillion cubic feet (tcf) of natural gas and 200 million barrels of crude oil in the Pazan field, located in Fars and Bushehr provinces. Production is expected to begin within 40 months, with potential reserves reaching seven tcf of recoverable gas - equivalent to. Tehran (IP)- In a significant announcement at the 28th International Iran Oil and Gas Expo in Tehran, the Oil Minister declared Iran's achievement of self-sufficiency in oil, gas, and petrochemicals through domestic capabilities. Iran Press / Iran news: Javad Owji, during the Expo's inauguration. Iran is entering a new and decisive phase of its modern history. Facing recurring blackouts, worsening water shortages, and an overstretched power grid, Tehran is now making a clear and bold energy shift — moving the Islamic Republic closer to Russia and China. In mid-October 2025, Azerbaijan's deputy prime minister announced the.
