

The latest standards for energy storage system acceptance

Overview

UL and IEC have updated safety standards, and NFPA introduced comprehensive requirements for energy storage, fire safety and emergency planning in 2023. The standard also cross-references NFPA 855 installation rules, so passing UL 9540 streamlines local approvals. Discover industry benchmarks, real-world case studies, and emerging trends shaping validation. This definitive standard focuses on the planning, performance assessment, and safe management of Electrical Energy Storage (EES) systems within grid-connected facilities—signaling a major evolution for grid reliability, renewables integration, and industrial safety. Indeed, there are estimates it will reach \$289 billion in spending in 2025. Since the first edition in 2020, each cycle has refined how the standard addresses. Sandia National Laboratories is a multimission laboratory managed and operated by National Technology & Engineering Solutions of Sandia, LLC, a wholly owned subsidiary of Honeywell International Inc. Department of Energy's National Nuclear Security Administration under contract.
