

The main transformer of the Canadian Industrial Park energy storage power station is in place

Overview

Partners in developing a major energy storage project in Canada recently finalized a deal with Tesla to supply its shipping container-sized Megapack system to power the 250-megawatt (MW) facility. Toronto (Canada), October 7, 2025 – Boralex inc. (“Boralex” or the “Company”) (TSX: BLX) and its partner, Six Nations of the Grand River Development Corporation (“SNGRDC”) are proud to announce that the Hagersville Battery Energy Storage Park has been awarded the Innovative Canadian Clean Power. The installed capacity of energy storage larger than 1 MW—and connected to the grid—in Canada may increase from 552 MW at the end of 2024 to 1,149 MW in 2030, based solely on 12 projects currently under construction 1. The Andasol plant uses tanks of molten salt to store captured solar energy so that it can continue generating electricity when the sun is not shining. This is a list of energy. In light of National Indigenous Peoples Day, we want to acknowledge the diverse Indigenous communities located in this region and whose presence continues to enrich the broader community. 4 Wind Solar Gas Dual Fuel (*Genesee 1, 2, 3 shown as one facility) Waste Heat Landfill Gas In Operation.

List of energy storage power plants

This is a list of energy storage power plants worldwide, other than pumped hydro storage. Many individual energy storage plants augment electrical grids by capturing excess electrical energy during periods of low demand and storing it in other forms until needed on an electrical grid. The energy is later converted back to its electrical form and returned to the grid as needed.
