

# The proportion of solar modules in export products

## Overview

In 2019, solar system components accounted for the largest share in the export of solar power generation products and related products (49%), followed by equipment for manufacturing photovoltaic cells (29%), energy storage cells (13%), solar lamps and other equipment (10%). Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. Between 2025 and 2029, global solar photovoltaic capacity additions are projected to increase yearly and range from some 655 gigawatts in 2025 to 930. In 2024, solar contributed 267 GWac (309–357 GWdc), or 64% of new generation capacity, in China, and cumulative solar capacity reached 852 GWac (1,000–1,048 GWdc), or 26% of total cumulative capacity. In 2024, 40% of new PV was distributed, and 60% was utility scale. Data collected on both the monthly and annual Form EIA-63B are protected from disclosure of individual company data. As a result of this protection. In 2024, the EU imported solar panels to the value of €11.9 billion and wind turbines worth €0.

Global solar PV supply chain

Discover all statistics and data on Global solar PV supply chain now on statista !

Executive summary – Solar PV Global Supply Chains

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...

Europe Remains Largest PV Module Export Market, but Share ...

In terms of export product structure, the proportion of silicon wafer and cell exports declined, while the proportion of module exports increased. After a decline in the third quarter, silicon ...

Monthly Solar Photovoltaic Module Shipments Report

Beginning in January 2017, we required some of the respondents for the annual survey Form EIA-63B, Photovoltaic Module Shipments Report, to report monthly data. The subset of ...

India's solar cell and module imports decline by 20

"India primarily exports solar modules. The export of solar cells is negligible. In fact, India's exports of solar modules were nearly 35 times that of ...

International trade in products related to green energy

Exports of solar panels fell by 22% in value while rising by 24% in quantity. Exports of liquid biofuels showed a higher decrease in value compared with quantity ( ...

Spring 2025 Solar Industry Update

Therefore, the percentage of solar consumed in each state may vary from its percentage of net generation. Some of the increase in some states (e.g., Massachusetts) is due to a reduction in ...

Solar Supply Chain and Industry Analysis | Solar Market Research ...

NLR conducts detailed supply chain analysis for specific photovoltaic module technologies. These analyses include production locations, supply chain risk and costs, and material ...

Tracking China's clean energy export dominance in ...

From 2018 through 2022, solar parts were the dominant export earner among China's clean energy suite, but since then a drop-off in solar sales as ...

What is the Proportion of Solar Modules and Other Products in Global ...

In 2019, solar system components accounted for the largest share in the export of solar power generation products and related products (49%), followed by equipment for manufacturing ...
