

The whole process of EMS for communication base station

Overview

• The phases of communication include notification, potential prearrival instructions for the caller, dispatch, communication during on-scene care, and communication with the receiving facility while en route. This Emergency Medical Services (EMS) Operations and Communications Resource Manual has been developed by the State of California Emergency Medical Services Authority (EMS Authority) primarily as an operational manual to be available to all local EMS agencies. It contains useful information for EMS. Repeaters are used within an EMS communications system to allow Cell phones within an EMS system One role of the FCC in the EMS communications systems is to In addition to communicating with dispatch to acknowledge the dispatch that your are in route, and again while en route to report your. Communications is at the center of what and how we, as emergency responders fulfill our professional responsibilities. "The use of cellular telephones is permitted. Henry Geller, Assistant Secretary for Communications and Information March 1979 I r PREFACE This document was prepared at the request of the Communi cat~. ons Working Group of the Interagency Emergency Medical Ser vices Committee.
