

## Top 3 wind power generation

### Overview

The countries with the largest market volume for new wind turbines were in 2024: China (86,7 GW), Brazil (5,4 GW), United States (4,2 GW), India (3,4 GW), Australia (3,3 GW), Germany (3,2 GW) and the United Kingdom (2,2 GW). Long-term developments: Growth continues but. Wind power and its synonym wind energy are terms that refer to electricity that has been generated by harnessing the power of wind, as opposed to other methods such as solar panels or the burning of fossil fuels. Since 2010, more than half of all new wind power was added outside the traditional. China is a global leader in wind energy generation. China experienced a remarkable surge in its solar capacity, averaging an annual growth of 78. The list below highlights the 13 largest wind farms in the world based on total capacity. Gansu Wind Farm. Bonn (WWEA) - In 2024, new wind turbine installations fell far short of expectations, reaching 121'305 Megawatt, slightly less than in 2023, when 121'465 MW were installed.

### Global Statistics

These countries demonstrate that the world as a whole can achieve a 40-50% share of wind power in total electricity generation, as outlined by the WWEA in a long-term scenario.

U.S. wind generation hit record in April 2024, exceeding coal-fired ...

Electricity generation from wind established a new record in the United States in April, and wind generation exceeded coal-fired generation in both March and April, data from our July 2024 ...

Wind Energy by State | February 2026 | Choose Energy

Feb 2, 2026· The following table shows states with significant wind energy generation, the amount (in thousand megawatt-hours) produced in November, and the percentage increase or ...

Top 10: Wind Energy Projects | Energy Magazine

The top wind energy projects supporting the energy transition include companies like China Longyuan Power, SSE Renewables, Equinor, ...

Wind Power by Country 2026

The United States is the second-largest producer of wind power, and generated 341.40 TWh of wind power in 2021, equal to just over 21% of total ...

Top 10 Nations Leading in Wind Energy

Explore the top 13 largest wind farms in the world by capacity, with key facts, stats, and global clean energy insights.

Best, Worst Ranked States for Wind Power in 2025

This ranking highlights where wind energy is thriving — and where it's not — based on the latest generation data, wind capacity trends, and ...

Wind power by country

Denmark produced 58% of its electricity from wind in 2023, a larger ...

Global Wind Power Generation Rankings 2025: Top 10 Countries ...

Meta Description: Discover the 2025 global wind power rankings and learn why China, the US, and Germany dominate. Explore policy drivers, technological breakthroughs, and regional ...
