

Tower solar panel installation method

Overview

This Method Statement for Solar Panel addresses the hazards and controls involved with solar panel installation on a roof. The purpose of this Solar Installation Safe Work Method Statement (SWMS) is to describe the sequential approach for the installation of PV Modules in accordance with the contract requirements. This method statement is subject to the requirements as stated in the following regulatory & statutory documents, applicable. MS – Method Statement ITP – Inspection and Test Plan IFC – Issued For Construction HSE – Health, Safety & Environment QA/QC – Quality Assurance/Quality Control. MEP Sub-contractor will deploy a dedicated team for the required logistics and material movement in -out of the project. Works will be started or carried out only when all associated main contractor's procedures are completed and by ensuring safe access to work areas will be available through hoist lifts/access ladders to carry out the work.
