

Trina's new photovoltaic panels

Overview

Trina's newest panel, the Vertex S Series, features TOPCon solar cells delivering top-tier efficiency and performance. The latest models achieve up to 22.5% efficiency, placing them competitively among premium solar manufacturers while maintaining affordable pricing. The demand for high-efficiency solar technology is increasing worldwide, and Trina solar panels are one of the most recognized in the industry. This Trina Solar Panels review. Model Availability Shift: While Trina Solar's 400W panels were popular choices, some specific 400W models have limited availability in 2025 as the company transitions to higher-wattage panels in their current product lines, making it important to verify current model availability with authorized. Trinasolar will unveil new solar panel and energy storage products for the U.S. The power station is located in Wanning City, Hainan Province, China, and is supplied by Trinasolar. The project adopts Trinasolar's Vertex N 700W series modules, with an average annual power generation capacity of up to 133 million kilowatt-hours, which continuously injects "green energy" into the grid. Founded in 1997, Trina Solar has been delivering residential and commercial photovoltaic solar panels across the globe from its home base in China.
