

Trinidad and Tobago energy storage policy

Overview

This document outlines some of the options available for deploying Energy Storage (ES) within the local electricity sector. Progress Copyright © 2026 Ministry of Energy and Energy Industries. It is significantly impacted by international climate change policies. It is expected that after COP26 various nations will intensify their efforts to achieve Net-Zero carbon conditions by 2050 or 2060. Trinidad and Tobago is a major exporter of LNG, ammonia, methanol and fertilizers. The economy will therefore depend on a series of papers. In fact, in 2024, electric car sales surpassed 17 million worldwide, increasing to the national grid by December 2025. It is anticipated, that the green energy diversification strategy will reduce greenhouse gas (GHG) emissions. Whatever your angle, Port of Spain's power storage policy is shaking up Trinidad and Tobago's energy landscape – and it's way more exciting than that time someone tried to deep-fry a voltage regulator. (Spoiler: Don't try that at home.)
