Overview

Calculate the appropriate uninterruptible power supply (UPS) size by entering your equipment power requirements and backup needs below. This calculator helps determine the correct UPS capacity in VA (Volt-Amps) and required battery runtime based on your. Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access batteries or top terminal (monobloc) batteries. The XPCC UPS Selector is an engineering-based UPS sizing tool that calculates required UPS capacity and runtime capability from real project inputs. Buy too little capacity and you'll face an expensive midnight call-out. Cabinet solutions are available in both size and color to match most UPS system manufacturers. Cabinet solutions can be equipped with an optional circuit breaker for either. Equipped with reversible front and back doors and removable side panels, the Minuteman Power Cabinet prioritizes security with locking mechanisms operated by included keys, guarding against potential damage, tampering, or theft. The doors and side panels are designed for quick release, simplifying.
