

## What size are the 660 photovoltaic panels

### Overview

Most 660W photovoltaic panels measure approximately 1,640–2,384 mm in length and 992–1,303 mm in width, with thickness ranging from 35–40mm. These dimensions vary across manufacturers - think of it like smartphone sizes where different brands optimize for their specific. Standard Residential Panels Optimize Space and Handling: The industry-standard 60-cell panel dimensions (65" × 39" × 1.5") aren't arbitrary - they represent the optimal balance between power output, installation ease, and roof space utilization. This model maximizes power generation with more than a 6.5% gain and provides consistent performance.
