

# What to do when the energy storage battery pack is put into the box

## Overview

Before removing or reconnecting with the running system, make sure to turn off the power and shut down the system to avoid the risk of electric shock. In case of fire, use a dry powder fire extinguisher. Battery Energy Storage Systems, or BESS, help stabilize electrical grids by providing steady power flow despite fluctuations from inconsistent generation of renewable energy sources and other disruptions. While BESS technology is designed to bolster grid reliability, lithium battery fires at some. Our V series battery pack is designed to provide safe, high-performance energy storage solutions for a variety of applications. Someone must still work on or maintain the battery system. ACP has compiled a comprehensive list of Battery Energy Storage Safety FAQs for your convenience. Read ACP's FAQ document to learn more in detail.
