Where to find information on wind turbine generators

Overview

The Small Wind Guidebook helps homeowners, ranchers, and small businesses decide if wind energy can work for them. More wind energy resources can be found at WINDExchange, which has lesson plans, websites, and videos for K-12 students, as well as information about the. Wind turbines work on a simple principle: instead of using electricity to make wind—like a fan—wind turbines use wind to make electricity. Wind turns the propeller-like blades of a turbine around a rotor, which spins a generator, which creates electricity. To see how a wind turbine works, click on. Wind turbines use blades to collect the wind's kinetic energy. Reducing Cost of Energy (CoE) requires highly efficient wind turbines that run without disruption. Gain the edge with powerful, reliable components, seamlessly integrated for optimal availability.

Article Content

Electricity generation from wind

In 2022, wind turbines were the source of about 10.3% of total U.S. utility-scale electricity generation. Utility scale includes facilities with at least one megawatt (1,000 kilowatts) of electricity ...

Wind turbine: what it is, parts and working | Enel Group

Read all about the wind turbine: what it is, the types, how it works, its main components, and much more information through our frequently asked questions.

Wind equipment | Siemens

Lower your costs of energy generation with powerful, reliable, integrated wind turbines. Gain optimum availability and performance from Siemens wind equipment.

Wind turbine

OverviewHistoryWind power densityEfficiencyTypesDesign and constructionTechnologyWind turbines on public display

A wind turbine is a device that converts the kinetic energy of wind into electrical energy. As of 2020, hundreds of thousands of large turbines, in installations known as wind farms, were generating over 650 gigawatts of power, with 60 GW added each year. Wind turbines are an increasingly important source of intermittent renewable energy, and are used in many countries to lower energy costs and reduce reliance on fossil fuels. On...

Shanghai Fengxian Haiwan Expansion Offshore wind farm

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.

Wind turbine: How it works, parts, and existing types

Learn all about wind turbines: find key information about how they work, their parts, and the 4 different existing types.

Complete wind energy and solar energy solutions | Suzlon Energy Ltd

Suzlon Energy Ltd, a world leader in renewable energy solutions develops products in the Wind Energy & Solar energy sector and is a leading wind turbine and windmill supplier.

Shanghai Fengxian

© 2026 LUP Microgrid Laboratory & Technology - All rights reserved

The turbines for Phase 1B are located in the Fengxian District, Shanghai, China, with exact coordinates for Phase 1 being 30.7566, 121.8196. The wind farm is owned by Shanghai Electricity Xinda...
