

Will the price of new energy battery cabinets continue to drop

Overview

In 2025, the global average price of a turnkey battery energy storage system (BESS) is US\$117/kWh, according to the Energy Storage Systems Cost Survey 2025 from BloombergNEF (BNEF), published last week (10 December). That was a 31% decline from 2024 numbers. Lower pack prices, increasing competition among manufacturers and improved system designs all. With a \$65/MWh LCOS, shifting half of daily solar generation overnight adds just \$33/MWh to the cost of solar. This report provides the latest, real-world evidence on the cost of large, long-duration utility-scale Battery Energy Storage System (BESS) projects. Since last summer, lithium battery cell pricing has plummeted by approximately 50%, according to Contemporary Amperex Technology Co. Limited. 2025 is shaping up to be the year when energy storage battery prices make lithium-ion cells cheaper than a Starbucks latte per kilowatt-hour.

Article Content

Battery storage hits \$65/MWh – a tipping point for solar

Battery storage costs have fallen dramatically over the past two years, and the decline continues. Following a steep decline in 2024, Ember's ...

Battery prices collapsing, grid-tied energy storage ...

From July 2023 through summer 2024, battery cell pricing is expected to plummet by over 60% (and potentially more) due to a surge in EV adoption ...

Will the Price of Energy Storage Cabinets Continue to Drop?

As renewable energy adoption accelerates globally, one question keeps popping up: will the cost of energy storage cabinets keep falling? Let's dive into the factors shaping this trend and what it means ...

Battery storage system prices continue to fall

BNEF said in its Energy Storage Systems Cost Survey 2025 that, as with last year's findings, bigger battery cells and more energy-dense BESS ...

Battery Storage Costs Hit Record Lows as Costs of Other Clean ...

According to BloombergNEF's Levelized Cost of Electricity 2026 report, the cost of battery storage projects plummeted to new lows in 2025 even as most other clean power ...

Cost Projections for Utility-Scale Battery Storage: 2025 Update

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...

Li-ion Battery Prices Could Drop to \$108/kWh in 2050: ...

The cost of four-hour lithium-ion (Li-ion) battery systems could decline from \$334/kWh in 2024 to as low as \$108/kWh or remain as high as ...

Energy storage in 2025: Year in review

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from 2024. This represents the steepest ...

How cheap is battery storage? | Ember

The price of Lithium Iron Phosphate (LFP) battery cells for stationary energy storage applications has dropped to around \$40/kWh in Chinese domestic markets as of November 2025. ...

2025 Energy Storage Battery Prices: Trends, Drivers, and What's Next

With prices for large-scale lithium iron phosphate (LFP) batteries plummeting 35% in 2024 alone , the industry's racing toward what analysts call the "holy grail" of \$50/kWh.
